# ABOUT INDIAN INSTITUTE OF PUBLIC HEALTH HYDERABAD (IIPH-H)

The Indian Institute of Public Health Hyderabad (IIPH-H) as an arm of the Public Health Foundation of India (PHFI) aims to strengthen Public Health in India. IIPH-H works in the domain of public health education and training, pursues research and advocacy, and supports policy development, as aligned to the public health priorities of the state and the nation. The governance of IIPH Hyderabad is managed by a locally empowered society called the Institute of Public Health Sciences Hyderabad (IPHSI).

IIPH-H envisions advancing public health to achieve health equity and promote healthy communities. The Institute is involved in training public health professionals through long- and short-term courses each year. A multi-disciplinary pool of faculty and researchers includes a talented diaspora that aims to create an environment that supports excellence in instruction, research, and practice. In addition, the institute collaborates with various academic, research, and administrative organizations to conduct workshops and conferences, and to undertake public health research and evaluation.

# FOCUS AREAS OF THE INSTITUTE

IIPHH envisions that each of the focus areas mentioned above shape in the form of Centres of Excellence (CoE) as we move ahead. These CoEs will serve as bastions of innovation and progress, fostering impactful change through various avenues. Below are the proposed activities proposed under each of these CoE's:

**Research**

**Academics**

**Training**

**Capacity Building**

# Governing Board

**Prof. Srinath Reddy**  
Former President - PHFI  
Former Head - Dept of Cardiology, AIIMS

**Srini Raju**  
Co-founder & Chairman  
iLabs Group

**GV Prasad**  
Co-Chairman & MD  
Dr. Reddy's Laboratories

**Dr. GN Rao**  
Founder  
LV Prasad Eye Institute

**Mahima Datla**  
Managing Director  
Biological E

**Dr. Madhu Mohan**

Entrepreneur

**Hari Buggana**  
Chairman & MD  
InvAscent

**Prof. Sanjay Zodpey**  
President  
Public Health Foundation of India

**Secretary - HM&FW**  
Government of Telangana

# MESSAGE FROM THE CHAIRMAN

Dear Readers,

As we stride forward into the new horizons of public health and education, I am delighted to address you through our newsletter, reflecting on the pivotal role of IIPH Hyderabad in the noble pursuit of nation-building through healthcare and education.

The landscape of public health in India is evolving, and our commitment to this field is unwavering. The Institute remains dedicated to equipping future leaders with the necessary knowledge, skills, and expertise to address the diverse and complex health challenges of our nation. Education stands as the beacon guiding our journey. It is through education that we empower the next generation of healthcare leaders and innovators, equipping them with the knowledge and skills to address the complex health challenges of our times. Our institute stands as a testament to this commitment, providing a nurturing environment for learning, research, and innovation.

Furthermore, the Institute's commitment extends beyond the confines of academia. We actively engage with communities, policymakers, and stakeholders to translate knowledge into action. By bridging the gap between research and implementation, we aim to create tangible, sustainable impacts in public health across the country.

The recent global health crisis particularly the Covid 19 pandemic has shed light on the critical need to fortify our efforts in combating infectious diseases. It's with great enthusiasm that I announce our Institute's strategic plan to establish a Center of Excellence in Infectious Diseases. This initiative is not just a testament to our commitment but a response to the urgent need for comprehensive research, education, and practical solutions in this domain. The Center will serve as a hub for innovation, collaboration, and resourceful action, leveraging the expertise of our faculty and partnerships with esteemed organizations.

As we navigate the complexities of the present and envision a healthier, more resilient India, I am immensely proud of the unwavering dedication and commitment demonstrated by each member of our Institute. Together, we shall continue to make strides in advancing public health, contributing significantly to the nation's well-being and prosperity.

In closing, I extend my heartfelt gratitude to everyone associated with IIPH Hyderabad. Together, let us continue our journey of shaping a healthier, brighter future for our nation.

**- Srinivasa C Raju**  
Chairman

## FROM THE CHIEF MENTOR'S PEN

Dear All,

As a new year dawns, there is a surge of expectations on the progress that India will achieve in 2024. For ensuring that those promises are kept, we need to promote, protect and preserve the health of our people and restore the health and wellbeing of persons who have experienced illness or injury. That is possible only when we have efficient, equitable and empathetic health systems which are aided by policies and programmes in other sectors integrally aligned to health priorities. Public health creates the broad platform on which biological, social, economic, environmental and commercial determinants of health are addressed to promote population health and protect individual health. It does so by enabling policies, strengthening systems, invigorating implementation of programmes and actively engaging communities. The Covid-19 pandemic has taught the world that investments in public health are vital if we wish to safeguard economic and social progress.

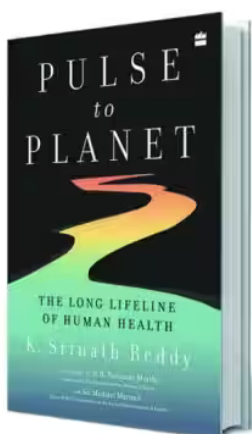

The Indian Institute of Public Health at Hyderabad (IIPH-H) has been established through the collaborative endeavours of the Public Health Foundation of India (PHFI), Government of Telangana and philanthropic private donors. Guidance and support from national and international academia and civil society voices ensure that the purpose, process and products of our work reflect relevance, excellence and impact with equity.

Set in a sylvan landscape in Rajendra Nagar, the campus is rapidly expanding its infrastructure, technical strength and array of productive partnerships. New academic and training programmes are on the anvil to expand the educational ensemble, as the institute seeks to create a multi-layered, multi-skilled public health workforce which will connect science to society and policy to people. Elucidatory and implementation research is advancing knowledge creation and knowledge translation to enhance people's health across all sections of society.

As we receive the new year with earnest resolutions of what we hope to achieve in its company, the vision and wisdom of PHFI's Board, blended with the verve and vigour of its executive team, is the elixir with which we shall raise a toast to 2024!

Wish you a bright and beautiful new Year brimming with health and happiness.

- Prof. K Srinath Reddy  
Chief Mentor

Published in September 2023 by HarperCollins India, the book explores the many connections which influence human health. These underlie the exquisite ingenuity with which nature has shaped human bodies and link us to our social and physical environment. Our actions, individually and collectively, are disrupting this harmony, endangering both human health and planetary well being. The book calls for urgent actions to protect ourselves and preserve a healthy planet for future generations.

## INTRODUCING NEW DIRECTOR

**Dr. Rentala Madhubala**  
Director

Prof. R. Madhubala is an eminent, nationally and globally recognized academician-researcher-administrator. She has been a Professor in the School of Life Sciences at Jawaharlal Nehru University, New Delhi for three decades, with a very strong track record both academically and administratively. She was awarded the AS Paintal Distinguished Scientist Chair of ICMR for five years till August 2022. Earlier, she was Dean of the School of Life Sciences, JNU, Director of HRD&C of UGC at JNU and Director of the Advanced Research Facility of JNU. She served in these key administrative positions for 6 years.

She has been conferred several prestigious awards and honors including the President of India's Visitor Award for research, the Rockefeller Career Award, USA, the Career Research Initiative Award by Wellcome Trust, UK and the National Senior Women Bio-scientist Award for lifetime achievements by the Department of Biotechnology, Govt. of India. She was elected to The World Academy of Sciences (TWAS). She is a member of all the 4 major National Academies of Science - FNA, FNAMS, FNASc, F.A.SC. She has been an adjunct faculty at the Centre for Infectious Diseases, Seattle (aka Seattle Biomedical Research Institute) USA for 15 years while being a full-time faculty member at JNU. She was conferred a Visiting Professorship by the American Society of Tropical Medicine and Hygiene (ASTMH). She has extensive international training and research experience in infectious diseases with several global collaborations and projects with institutions in the USA, UK, Israel, Sweden, Canada, Italy, Russia, Switzerland, Germany, Japan and South Korea. She was principally responsible for managing international training programs in Global Infectious Diseases for six years in association with the University of Washington, Seattle USA, and Seattle Biomed supported by grants from NIH, USA.

Dr. Rentala Madhubala's research focus is Tropical diseases. Her major contributions are in Medical Biotechnology spanning Drug Development, the development of diagnostic biomarkers for drug resistance in clinical isolates, point-of-care devices and diagnostic assays for infectious diseases, vaccine development, high throughput immunological screening of vaccine candidates, and vaccine concept development. She has over 129 research publications in high-impact international journals and 32 research scholars obtained their Ph.D.s under her guidance.

**"In today's globalised world, Public Health has become more important than ever before. With the reappearance of deadly pandemics, there is a clear need to look at Public Health holistically including raising public awareness of critical health concerns, raising capacity of healthcare workers and ensuring pandemic preparedness. In my new role as Director (i/c), I look forward to advancing IIPH's role and profile in all these areas while fostering a collaborative approach with Governments and all stakeholders." - R. Madhubala**

# FACULTY AND DEANS

**Prof. Shailaja Tetali**  
 Officiating Dean  
 (Research & Policy)

**Dr Rajan Shukla**  
 Officiating Dean  
 (Public Health Practice &  
 Community Engagement)

**Prof. Raghupathy Anchala**  
 Dean  
 (Academic Programs & Training)

**Dr. Sirshendu Chaudhuri**  
 Associate Professor

**Dr. Gowri Iyer**  
 Assistant Professor

**Dr Nirupama A Y**  
 Senior Lecturer

**Dr. Varun Agiwal**  
 Senior Lecturer

**Dr M. Jayaram**  
 Advisor  
 (Government Engagement)

# ADMINISTRATIVE STRUCTURE

## Administration

**Deepthi Reddy**  
Chief Operating Officer

The Administrative Office stands as a foundational pillar within the structure IIPH-H, playing a crucial role in the seamless functioning of operations and administrative endeavors. Spearheaded by Ms. Deepthi Reddy and supported by the collective expertise of various divisions, the Administrative Office is integral to maintaining efficiency and effectiveness across various facets of the institute.

## Office of the Director

**Rohit Tiwari**  
Office of the Director

The Director's Office stands as the strategic nucleus guiding the overarching vision of the Indian Institute of Public Health, Hyderabad (IIPHH). Helmed by Dr. Rentala Madhubala, this pivotal office is instrumental in steering the trajectory of the institution toward academic excellence, research innovation, and community impact.

## Development Office

**Ankit Talwar**  
Head - Fundraising

The Development Office is a pivotal force within PHFI and IIPH. Tasked with developing a fundraising approach and strategy, the office operates under the direction of the Fundraising Committee.

# CAMPUS DEVELOPMENT & EXPANSION UPDATES

The Indian Institute of Public Health Hyderabad, stands at the threshold of a transformative phase in its pursuit of academic brilliance and innovation. Anchored by its Academic and Laboratory Buildings, the Institute has been a crucible of learning, research, and community engagement. As it charts a path toward a dynamic future, it envisions the creation of a state-of-the-art campus sprawling across its 43 acres of land.

At the heart of the Institute's current infrastructure lies the Academic Building - a hub of knowledge dissemination and collaboration. This facility encompasses modern classrooms, administrative spaces facilitating seamless operations, a library, and a versatile multipurpose hall fostering interactions and events that shape minds and initiatives.

Complementing this academic nerve center is the Laboratory Building, home to advanced facilities such as the HiRapid Lab and Public Health Lab. These spaces serve as crucibles for scientific exploration and innovation, contributing significantly to the Institute's research endeavors and its commitment to public health advancement.

In November 2023, significant progress was made toward the realization of the Centre for Infectious Disease at IIPHH campus. An architect has been identified and appointed to spearhead the design process for the campus and specifically for Phase I which includes the facility - Centre for Infectious Disease. The design phase for the Centre is currently underway, marking a crucial step towards creating a state-of-the-art facility tailored to meet the demands of cutting-edge research and response to infectious diseases.

Looking ahead, the Institute is gearing up for a ground-breaking ceremony slated to take place in March 2024. This symbolic event will mark the commencement of construction, representing a milestone in our journey towards establishing a hub dedicated to combating infectious diseases.

Anticipating the construction phase, once the ground-breaking occurs, the timeline for building completion spans approximately 12 to 14 months. This period will witness the transformation of plans and designs into a physical structure, culminating in the realization of the Centre for Infectious Diseases - a testament to our commitment to advancing research, innovation, and public health initiatives.

## PROGRAM : HIGHLIGHTS

**Mr. Andre Nogueira**  
**Brown University / CEO - Leap Design**  
**(6th November 2023)**

**Topic**  
**"Design in Public Health"**

Andre Nogueira, the CEO of Leap Design and a distinguished Research Scientist at Brown University School of Public Health joined students, research staff and faculty at IIPH Hyderabad on 6th November 2023 for a guest lecture on Design in Public Health. Mr. Nogueira, as Cofounder of Design Laboratory at the Harvard University T.H. Chan School of Public Health and at Action Labs, IIT Institute of Design, shared his experiences in bringing design concepts to solve public health problems. He discussed how design evolved to solve specific organizational issues and helped bridge the innovation gap between what beneficiaries required and what public health provided. He further elaborated on using design to reframe solutions to better understand behavioral aspects of Public Health and contextualize and adapt public health programs.

**Prof. George Davey Smith**  
**University of Bristol**  
**(4th December 2023)**

**Topic**  
**"Triangulation of evidence in aetiological epidemiology: principles, prospects, limitations"**

Students, Research staff, and Faculty of IIPH Hyderabad welcomed Dr. George Davey Smith, Director-MRC Integrative Epidemiology Unit and Professor of Clinical Epidemiology from the University of Bristol, Dept of Population Health Sciences for a guest lecture on "Triangulation of evidence in aetiological epidemiology: principles, prospects, limitations" as part of the Royal Society Yusuf Hamied Visiting Professorship award.

Dr. Smith, a pioneer in the use of germline genetic variants for investigating modifiable causes of disease ('Mendelian randomization'), discussed the importance of triangulation in Causal inference, and highlighted various strategies to incorporate triangulation techniques in developing research studies. He also shared his experiences from studies he has led, including the Avon Longitudinal Study of Parents and their Children (ALSPAC).

# PROGRAM : HIGHLIGHTS

## Launch of Advanced Collaboration for Birth Defects and Developmental Disorders (30th August 2023)

IIPH & UNICEF

We are thrilled to announce the "Launch of Advanced Collaboration for Birth Defects and Developmental Disorders," on August 30, 2023, between the State health departments, Leading child health institutions and organizations, Industries, Media, UNICEF, Donors, and IIPH Hyderabad to pool resources, learning's, materials and provide a platform for sharing experience across various stakeholders to boost efforts towards the UNICEF global theme of "Survive and Thrive: Transforming care for every small and sick newborns."

The event's inaugural session was graced by the presence of key figures, including Nilima Prasad Divi from Divi's Foundation for Gifted Children, Prof. K Srinath Reddy (virtually), Honorary Distinguished Professor at PHFI, Dr. Srinivas Murki from NNF, Luigi D Aquino, Chief of Health at UNICEF ICO, Zelalem Birhanu Taffesse, CFO HFO, Kishore Mulpuri from BC Children's Hospital, University of British Columbia, among others.

The collaboration is envisioned to support the 5 states in southern India (Karnataka, Telangana, Andhra Pradesh, Tamil Nadu, Kerala) to enhance new-born screening, prevention and management components of all birth defects and developmental disorders under the Rashtriya Bal Swasthya Karyakram (RBSK), with special focus on developmental dysplasia of hip and autism spectrum disorders. Distinguished speakers from the states presented their experiences. Prominent institutions including the Institute of Child Health (Chennai), BMCRI (Karnataka), and noteworthy Civil Society Organizations such as NIPMR (Kerala) and APD Bangalore, also enriched the discourse by sharing their valuable experiences.

## 1st batch of Training of Trainers (TOT) under the Advanced Collaboration for Early Childhood Development (ACEcD)

IIPH & UNICEF

We are happy to share that the 1st batch of our Training of Trainers (TOT) under the Advanced Collaboration for Early Childhood Development (ACEcD) pilot intervention project in Kurnool District, funded by UNICEF India, has concluded successfully with an incredible participation of 57 members from Health, Women and Child Development and Panchayati Raj departments.

## PDSA Cycle Workshop at IIPH, Hyderabad

IIPH & Seva Foundation

IIPH Hyderabad hosted the PDSA Cycle Workshop from July 31st to August 4th at IIPH, Hyderabad with support from SEVA Foundation. Throughout this transformative workshop, participants delved deep into the world of quality improvement using the renowned PDSA (Plan-Do-Study-Act) cycle. They gained insights into effectively applying this powerful tool to understand their own routinely collected hospital data and to frame improvement projects.

# PROGRAM : HIGHLIGHTS

**Advanced Collaboration of Early Childhood Development (ACECD) pilot implementation work in Telangana (12th September 2023)**

**IIPH & UNICEF**

We are delighted to have had the opportunity of showcasing UNICEF- IIPH Hyderabad – Advanced Collaboration of Early Childhood Development (ACECD) pilot implementation work in Telangana to 35 country representatives of UNICEF NatComm, on the 12th September 2023. During their visit, IIPHH team accompanied the UNICEF delegates to two Anganwadi Centers in Kondapur Mandal, Sangareddy - specifically, Cherla Goplaram Village and Gollapally Village.

**Establishing a model district and State Resource Centre for Integrated Inclusive Early Childhood Development Project in Telangana.**

**IIPH & UNICEF**

Team from IIPHH in collaboration with UNICEF visited Sangareddy District Early Intervention Centre and Government Medical College for Establishing a model district and State Resource Centre for Integrated Inclusive Early Childhood Development Project in Telangana. IIPHH and UNICEF will also work in collaboration with other state resource centres such as BMC&RI, Bangalore and Institute of Child Health, Chennai to document and develop best practices for implementation of inclusive ECD interventions.

**Launch of the E2E Research Fellowship by the Indian Institute of Public Health Hyderabad (IIPHH)**

**IIPH & Pfizer**

The Indian Institute of Public Health Hyderabad successfully launched the E2E Research Fellowship. This prestigious fellowship, in collaboration with Pfizer, offers exceptional postgraduate scholars a transformative two-year program in public health research.

# DR. CYRUS POONAWALLA CENTRE FOR INFECTIOUS DISEASES

## Dr. Cyrus Poonawalla Centre for Infectious Diseases

IIPH Hyderabad is thrilled to share a news that marks a significant milestone in our pursuit of advancing healthcare and research in the field of infectious diseases. On the 22nd of July 2023, a momentous Memorandum of Understanding (MoU) was inked between the Indian Institute of Public Health, Hyderabad, and Viloo Poonawalla Foundation (VPF) at Hyderabad.

## The Genesis: Dr. Cyrus Poonawalla Centre for Infectious Diseases

This historical MoU embodies a visionary partnership as VPF, has generously pledged a monumental donation of INR 25 Crores. This magnanimous contribution is set to bolster and catalyze the establishment of the prestigious “Dr. Cyrus Poonawalla Centre for Infectious Diseases” within the precincts of IIPH Hyderabad campus.

## A Beacon of Innovation and Research

The envisaged Centre stands as a testament to IIPHH's shared commitment to revolutionizing the landscape of infectious disease research. It is poised to become the epicenter of pioneering research, cutting-edge technologies, and groundbreaking discoveries that will reshape the paradigm of healthcare interventions.

## Mission and Vision

The primary mission of the Centre is to spearhead interdisciplinary research, foster collaboration, and translate scientific breakthroughs into tangible solutions. IIPHH aims to provide a nurturing environment for scientists, healthcare professionals, and budding minds to converge, innovate, and combat infectious diseases that pose global health challenges.

## Future Prospects and Collaborations

This momentous collaboration with Viloo Poonawalla Foundation lays the foundation for an enduring partnership committed to the betterment of public health. With this invaluable support, IIPHH envisions a future where the frontiers of infectious disease research are pushed further, and innovative solutions emerge to safeguard communities worldwide

## A Vision Unfolds:

With the noble support extended by VPF, the wheels of progress have already been set in motion. The Centre has commenced its operations from a provisional space within IIPHH's campus premises, marking the initial phase of this transformative journey. Simultaneously, the work on the state-of-the-art Center of Excellence building has commenced, symbolizing our commitment to fostering innovation and excellence in healthcare.

## Welcoming Prof. Madhubala Rentala as Acting Head to the Centre

In the pursuit of excellence, IIPHH is delighted to announce the appointment of Prof. Madhubala Rentala as the Advisor to the Dr. Cyrus Poonawalla Centre for Infectious Diseases. Additionally, Prof. Rentala has taken charge as the IDirector of IIPHH. She brings a wealth of experience and expertise to lead this visionary initiative. Her leadership will undoubtedly guide us towards achieving new milestones in our quest to combat infectious diseases.

# RESEARCH & DEVELOPMENT

Research stands as the cornerstone of the Indian Institute of Public Health, Hyderabad. The pursuit of knowledge, innovation, and solutions to complex public health challenges is ingrained within its ethos.

Herein, we delve into the diverse array of research endeavors propelling the Institute's mission towards transformative impact:

PROJECT DESCRIPTION	FUNDING ORGANIZATION / COLLABORATOR
Advanced Collaboration for Inclusive Early Childhood Development (ACECD).	UNICEF
Experience to Evidence Research Fellowship	Pfizer
Capacity Building	MediCiti Institute of Medical Sciences and Share India
Audit of Andhra Pradesh Health System with the Comptroller Auditor General of India	Comptroller Auditor General of India
Asian-Pacific Hepato Pancreato Biliary Association congress (A-PPBA) 2023	A-PPBA
Evidence Informed Practice program	Seva USA, Seva Canada
HTAI / regional resource Hub at IIPH-Hyderabad	DHR, Government of India
iRaste - Training of lay first responders in road injury bleeding prevention. Improving road safety, working along with Transport and Police dept.	Intel Consortium
Disaster Preparedness - Capacity building of govt Hospital's Medical Officers for pandemic and disaster preparedness	National Disaster Management Authority, GoI
Public health inputs for safe mobility	IIITH through GoI
Virtual healthcare models of persons with disability	University of Melbourne
Heat related morbidity in Nalgonda	ISRO / Association of Healthcare Providers India [AHPI]
Strengthening Public health management cadre in AP	MOHFW, Government of Andhra Pradesh
Community based Cancer screening project in Sangareddy	KIMS Research Foundation
Road Safety for Schools in Telangana	UNICEF

## ACADEMIC PROGRAMS

The Indian Institute of Public Health, Hyderabad (IIPHH), stands as a beacon of academic excellence, nurturing the next generation of leaders and practitioners in the realm of public health. At present, the Institute offers two distinguished programs, each designed to empower individuals with knowledge, skills, and a vision to drive impactful change in public health domains:

### On-Campus Programs

- Master of Public Health
- Post Graduate Diploma in Public Health Management

Total Enrolment till date : 611 students

Total Graduates till date : 457 Students

## On-Going Batch Statistics

Male

30%

Female

70%

78 Students

Master of  
Public Health

PGDPHM

5

Students

At IIPHH, we believe education is the cornerstone of progress in public health - shaping minds, transforming practices, and improving lives.

# FESTIVITIES & CELEBRATIONS AT IIPH HYDERABAD

**INDIAN  
INSTITUTE of  
PUBLIC HEALTH  
HYDERABAD**

ESTABLISHED BY PHFI

# GIVING TO IIPH HYDERABAD

The Indian Institute of Public Health stands as a beacon in the realm of public health, driven by the generous support of a diverse community of its patrons. These collective contributions fuel our groundbreaking research, drive initiatives to combat pressing health crises, and provide vital assistance to the Institutes ongoing plans. Each donation, regardless of its scale, plays a pivotal role in sustaining the Institute's unwavering dedication to nurturing a cadre of visionary leaders in public health. These gifts are instrumental in tackling the most formidable health challenges confronting our nation, fortifying the resolve to create a healthier and more equitable future for all.

## Areas to Give

**Infrastructure /  
Campus Development**

**Capacity  
Building**

**Research**

**Faculty Chair**

## How to Give

- IIPH-H is eligible to receive CSR funding. All CSR contributions to IIPH-H have to be made toward Public Health Foundation of India, which is IIPH Hyderabad's sponsoring body.
- Individual Contributions made toward IIPH-H are used as general unrestricted funds across various facets of building the Institution or may be designated toward a cause that the donor identifies with. All donations within India (from individuals and corporations) get a 50% tax benefit under Section 80G.
